FEATURES

*OPTIONAL FEATURE.

HENLEY
STOVES

ICON KEYSTONE

ECO DESIGN READY 2022:

All Henley Ecodesign stoves in this brochure are stamped with our Ecodesign Ready 2022 logo.

EUROPEAN STANDARD:

A test for stoves fired by solid fuel, Incorporating corrigenda September 2003, June 2006 and August 2007.

CLEAN BURN:

A Henley stove with this icon features a tertiary air system. This creates a clean-burn system where hot air is pushed into the firebox above the normal height of the fire.

This allows the excess gases to combust given a cleaner burn.

EXTERNAL AIR:

A Henley stove with this icon has an external air facility allowing the air to come directly from outside your building rather than through a vent in the room. This is required for heat recovery systems in new build projects.

AIR-WASH:

All Henley stoves come with an air wash system which helps to keep the glass clean.

It uses a specially placed vent or vents to draw in air from the outside which will wash over the front of the glass.

A RATING:

"A" is the second-highest energy efficiency rating for wood burning stoves. This means that the stove is very efficient at converting the fuel (wood) into heat. A rated stoves typically have an efficiency of 75% or higher. This means that for every 100 units of wood that you burn, 75 units of heat are produced.

A+ RATING:

"A+" is the highest energy efficiency rating for wood burning stoves. This means that the stove is very efficient at converting the fuel (wood) into heat. A+ rated stoves typically have an efficiency of 80% or higher. This means that for every 100 units of wood that you burn, 80 units of heat are produced.
